AI Workshop Pre-Work

Map Your Workflow. Show Up Ready to Build.

Why this matters

The workshop is 100% hands-on. You will spend the day building real automations, tools, and AI agents around your actual work. But that only works if you walk in knowing exactly where your time goes and where the biggest opportunities are.

This worksheet gets your mind oriented on practical AI and automation before we ever sit down together. It is not busywork. Everything you write here becomes the raw material for what you build during the workshop. The more honest and detailed you are, the more useful your builds will be.

01 Your Info

Name: Tony

Role: _____

02 Everything You Do

Think about a full week. What do you actually spend your time on? List every task, even the ones that feel small or obvious. The small, repetitive stuff is usually where the biggest wins are hiding.

Area	What do you actually do here?	How often?
Communication *Emails, follow-ups, meeting prep, updates to stakeholders*	lots of emails - phone calls	· dozen or more emails · 4+ calls
Research *Deal sourcing, market analysis, due diligence, competitive landscape*		
Writing *Memos, reports, decks, summaries, investor updates*	a few memo's - updates	weekly
Data Work *Spreadsheets, portfolio tracking, metrics, dashboards*	IV portfolio analysis	

Complete this before the workshop. The more specific you are, the more you will get out of the day.

03 Your Biggest Time Sinks

Look at what you listed above. Which tasks eat up the most time, feel the most repetitive, or just slow you down? These are your automation targets for the workshop.

#	Task or Process	What makes this painful or slow?
1	email	Processing & responding
2	scheduling	
3	analysis of deals	
4		
5		

04 Where You Use Judgment

Not everything should be automated. What are the parts of your job that require your experience, relationships, or gut instinct? Knowing this helps us draw the right line between what AI handles and what stays with you.

#	Tasks that require your judgment or personal touch
1	analysis of deals
2	sources of LP's & investment opportunities
3	

05 What Would Make Your Job Easier?

If you could snap your fingers and have a tool, automation, or assistant that handled something for you, what would it be? Think big. Think practical. Both are useful.

#	What I want to walk out of the workshop with
1	
2	
3	

Complete this before the workshop. The more specific you are, the more you will get out of the day.
